Digital transformation

	Digitization	Digitalization	Digital Transformation
Description	 <p>Digitize and Organize data</p> <p>Convert analog information into digital form</p>	 <p>Automate and streamline processes</p> <p>Digitizes data and uses digital technologies to improve and optimize and automate process</p>	 <p>Align entire populations, systems, businesses or institutions with a digital technology or trend</p>
Experiences	<p>Convert Household Registration Book, HR documents, contracts into digital form</p>	<ul style="list-style-type: none"> • Onboarding process for banks • Logistics process in the F&B industry 	<ul style="list-style-type: none"> • Hotel solutions: Apply Smart Check-in, Integrate smart devices with the IoT system. • Finance: Apply customer biometric (voice, face) to KYC • Construction: Detect errors in the post-testing process of concrete pouring • Factory: Detect defects on the product surface

Why choose us?

Long-term partnership

We dedicate long-term collaboration. Many clients have been companying with us from beginning days.

Trusted by big corporations

We have many successful stories with Fortune 500 global companies, top banks in Vietnam as well as listed companies.

Ensured quality & Fast delivery

Since we've applied ISO 9001:2015 and ISO 27001:2013, the project quality is on international standards. Additionally, approaching scrum framework and minimum viable product (MVP shortens the delivering time) helps us deliver outcomes faster.

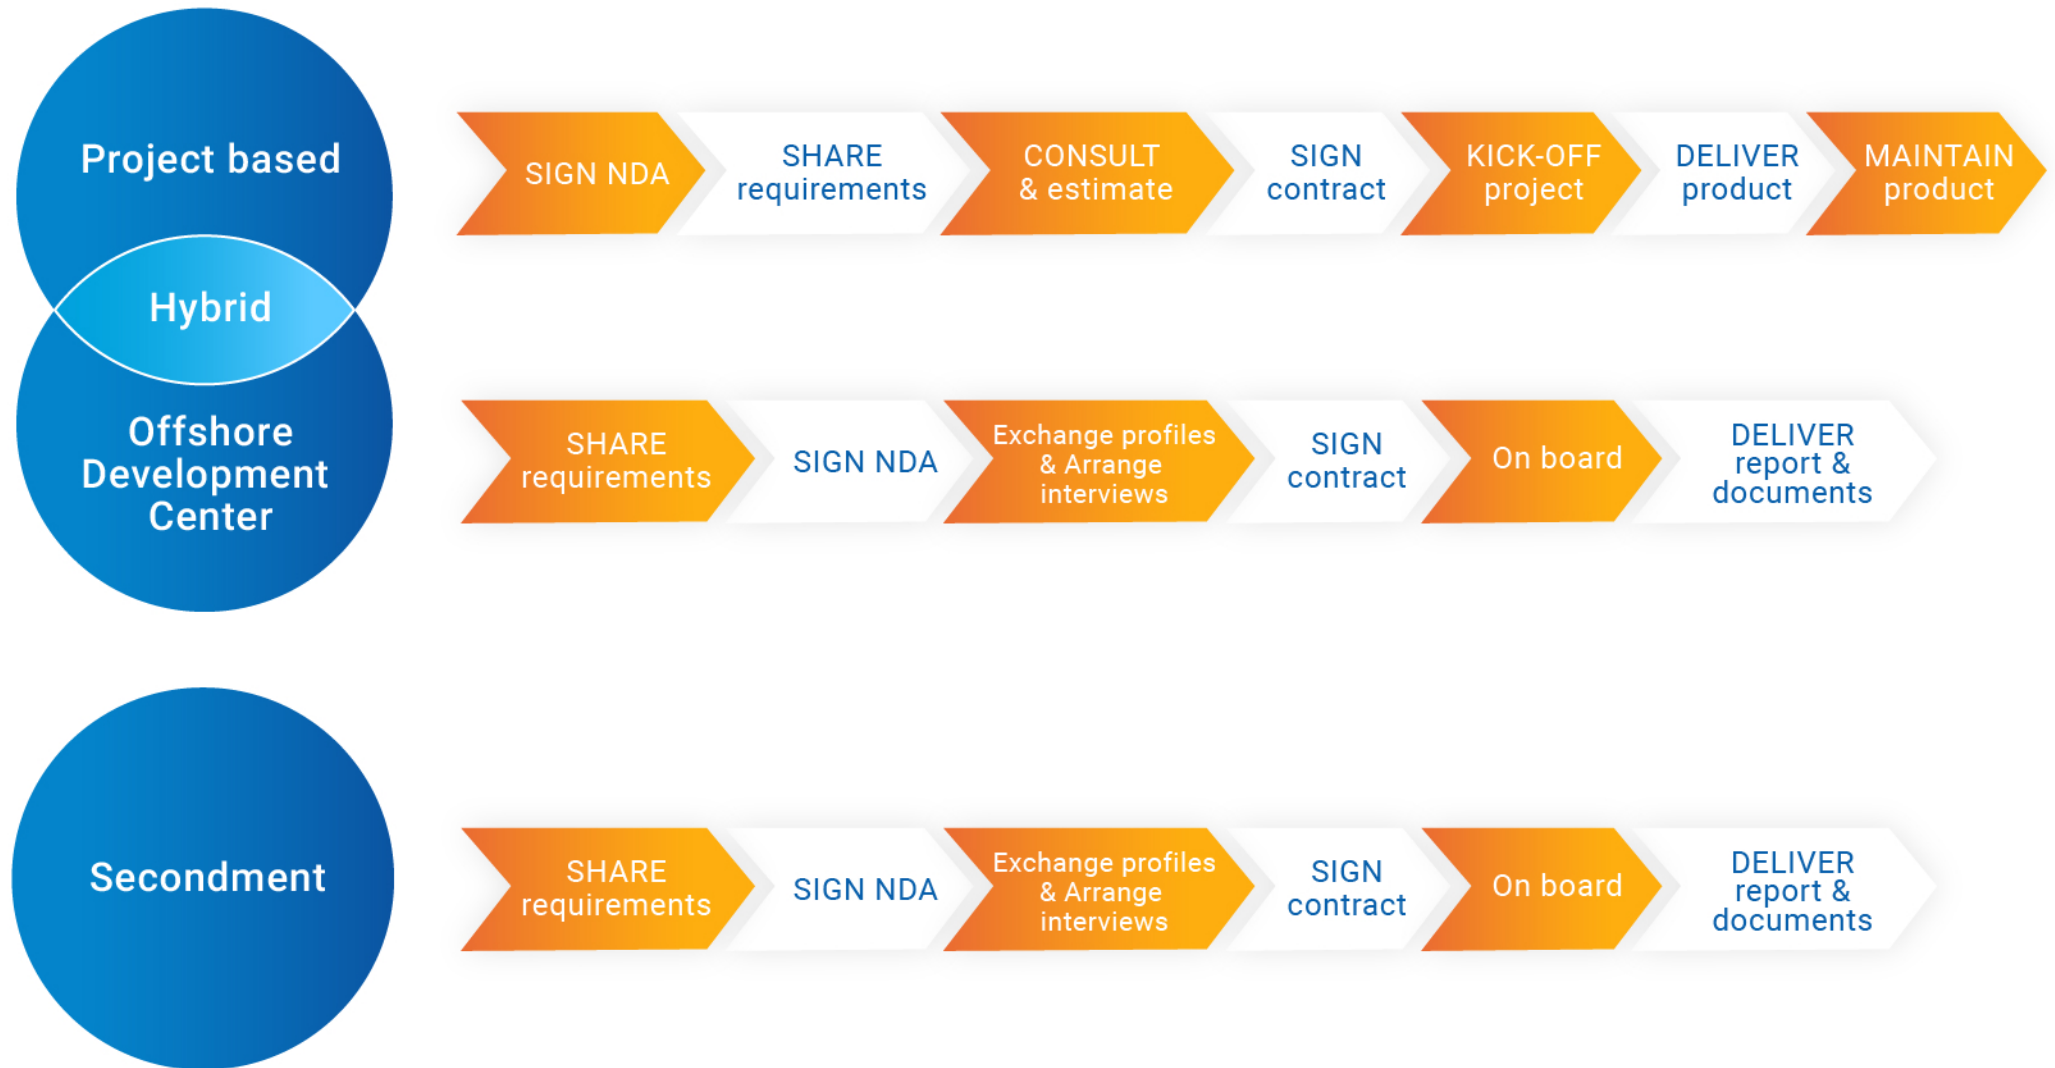

Competitive price

We have many advantages from Vietnamese government such as tax incentives, political stability and promoting education and training, especially in the IT field.

HOW TO COLLABORATE WITH US

Software development tools

HOW DO WE ENSURE OUTCOMES

Software Development process

Quality Management System

- ✓ Ensure outcomes adopting international standards.
- ✓ Deliver consistent quality.
- ✓ Minimize risks by detecting problems early and preventing repetitive mistakes.
- ✓ Follow a strict procedure to optimize resources and time.

Information security management systems

- ✓ Secure staff, processes and technologies via three main cornerstones:
 - Confidentiality: only the authorized people have the right to access information.
 - Integrity: only the authorized people can change the information.
 - Availability: the information must be accessible to authorized people in any case.
